Optimize Your AI ROI
with Expert Preparation.

Lay the foundation for AI success.

Integrating AI into your organization is imperative, and the sooner the better. You already know this, of course. Yet one question remains. How? The place to start is right here. Call in Access Sciences, the experts in information management.

We help private and public organizations properly prepare their vast collections of information, data, documents, and other assets so that whichever AI tools they use, they're getting optimum benefit. We bring order to your information chaos, which enables AI to truly deliver on its promise and empowers your people to be more efficient, more effective, more decisive, more successful.

Access Sciences offers a range of services to build your AI readiness strategy, define real-world use cases and train your workforce to be prepared, capable, and energized. Whether you need one service or the full range, our experts will help you make the transition from "I know we need AI" to "I know we're ready to get the most out of it."

Salesforce reports that employees are bringing their own AI tools to work, underscoring the need for organization leaders to implement sound AI strategies quickly.

Turn risks into advantages.

Rushing into AI unprepared can lead to wasted investments, errant decisions, high expenses, and lost opportunities. Implementations can be poorly executed due to deficient plans and limited skills. There are potential issues with ethics, biases, data privacy, misinformation, hallucinations, as well as legal and reputational risks. Access Sciences solves the challenges, with strategies that:

- **Maximize ROI:** We help you find and implement the right AI tools to optimize your investment, protect your assets, and enhance performance.

- **Optimize Operations:** We structure a durable, scalable, trustable information foundation that enables your AI solution to deliver to its fullest potential.

- **Empower the Workforce:** We help your people embrace change by giving them the skills to wield AI's power to do more and achieve greater things.

- **Compete to Win:** We help you use AI to build more ambitious strategies, think more creatively, seize opportunities, and surge to the forefront.

What We Do

Analyze, plan, and enable.

When you entrust AI prep to Access Sciences, you get a high-functioning, future-ready solution. But more importantly, you get a partner. We take on your challenges as our own, and bring solutions to help you mitigate risks, elevate performance, and be sure you're on the right road to realizing AI's greatest possibilities.

The Access Sciences Way.

- **Strategy:** This high-level assessment identifies the AI-readiness of your information. Our insights reveal gaps and risks, as well as opportunities and future implications.

- **Use Case:** We turn your strategy into actionable AI use cases for your organization. This is your real-world plan for successful implementation.

- **Adoption:** We set your workforce up for AI success through change-management guidance, planning, training, and skills enhancement.

- **Full Solution:** You can engage us on any of our service modules individually, or package them for a complete AI-readiness assessment.

What You Get

Expertise, clarity, assurance, opportunity.

Partner with Access Sciences and you get experts who know how to lay the groundwork to turn AI from a buzzword into a business accelerator. We put your technical ecosystem in order, tearing down silos that can block AI from accessing the full range of information it needs to be effective.

Access Sciences tailors a preparation plan for optimal benefit, from assessing your data quality and IT infrastructure, to addressing your culture around AI adoption, to evaluating early-stage AI initiatives, to establishing sound governance practices. In the end, instead of your AI tools bumping against limitations and running at subpar, they're empowered to be the productivity boosters they're meant to be. You already know that AI is an immense opportunity. Now let's make the most of it.

> " **There's no lack of ideas about how AI can be used. But what you need to think about first is how to get ready for it. If you're not AI-ready, it's not going to matter that you have AI tools.**"
>
> – Access Sciences CEO Steve Erickson
> CBS Interview

Are You AI Ready?

We help you find out by assessing these key elements of your organization.

- **Data Quality**
- **IT Infrastructure**
- **Governance Practices**
- **Early-Stage AI Initiatives**
- **Organizational Culture**

From Chaos, Clarity.

Access Sciences helps you transform your chaotic unstructured content into a powerful asset that enables your people and drives your objectives. When you organize and utilize your information to its full potential, you can get clarity, gain control, shed risk, and seize opportunities.
